THE NEED

Zambia is a nation of 15.1 million people, landlocked in the heart of Sub-Saharan Africa and is geographically roughly the size of Texas. Approximately 87% of Zambians live on less than $2 per day, making it one of the poorest countries in the world. Zambia’s ever changing economy remains heavily dependent on copper mining, which is significantly impacted by fluctuations in commodities prices.

In this nation crippled by poverty and illness, 12.5% of the adult population continues to suffer from one of the world’s most devastating HIV/AIDS epidemics. In Zambia, 46% of the population are under the age of 15 (66% are under the age of 25) and most have only completed seven years of schooling. Those that do complete high school are often unable to attend college and earn a degree. It is estimated that only 1 in 10 qualified high school graduates are able to pursue a university degree due to the lack of available programs or inability to afford tuition.

The need is great, but the opportunity is greater to impact a nation for good. Poverty, high unemployment and the lack of resources make higher education, a key component of economic transformation, nearly unattainable. Northrise University seeks to provide hope to a generation of young Zambians by providing a high quality, affordable education in a Christ-centered environment. It is the vision of Northrise University to empower the people of Zambia, ONE STUDENT at a time.
ZAMBIA FACTS:

- 87% of the population lives on less than $2 a day
- 12.5% of adults suffer from HIV/AIDS
- 46% of the population is under age 15
- 66% of the population is under age 25
- Average life expectancy is 52.1 years

HISTORY

Northrise University founders Moffat and Doreen Zimba experienced the challenges of growing up poor in Sub-Saharan Africa firsthand. As a small village boy, Moffat learned to read and write in the sand so that he might have a chance for a better life. Moffat and Doreen would go on to further their educations, but God had even bigger plans for their lives. During a Bible study in their home, God gave Moffat and Doreen a vision about starting a university in Zambia that would lead the way to restoring hope for a nation.

In faith, Moffat and Doreen left Zambia to attend college in Australia. Upon completion of their studies, God called them to Southern California, where Moffat received his doctorate degree from Fuller Theological Seminary and Doreen earned her MBA. While completing graduate degrees brought them one step closer to achieving their dreams, it was the partnerships they made along the way that kept them on the path to starting a university back at home.

After a 15-year journey, Moffat and Doreen returned to Zambia in 2003 to open the doors of Northrise University, the country’s first nationally chartered private university. Northrise is now a fully operational private Christian university equipping students daily for positions of transformational leadership in the future. In its first 10 years Northrise awarded over 250 degrees and now has alumni serving in business, education, government and ministries throughout Zambia.

WHAT SETS US APART
Northrise University seeks to transform Zambia from within by equipping its students to become future leaders through rigorous academic training and spiritual development. Led by fellow Zambians, students at Northrise are taught to integrate their faith into the workplace. Professors encourage students to achieve academic excellence by providing learning opportunities that enhance critical thinking, discipline, personal responsibility, character development and sacrifice. Graduates are encouraged to stay and work in Zambia after completing their studies, thereby retaining precious intellectual capital.

MOVING FORWARD
With a strong foundation and clear mission Northrise University is moving forward with plans to expand opportunities to empower the people of Zambia, ONE STUDENT at a time. The next chapter of this amazing story involves expanding campus buildings and infrastructure, adding program offerings and continuing to build strong relationships with our international academic partners. Consider joining us on the incredible journey to share hope and transform a nation.
MISSION STATEMENT

Northrise University is a Christ-centered educational institution dedicated to equipping men and women to work in ministry and business to contribute to the spiritual and economic transformation of Zambia.
The purpose of the ONE STUDENT SCHOLARSHIP PROGRAM is to provide financial support for students to receive a high-quality, Christ-centered education. With your generous support Northrise graduates are empowered to change their future and transform a nation, one student at a time.

ONE STUDENT attends Northrise University because of your generous giving.

ONE STUDENT is provided a quality education in a Christ-centered environment.

ONE STUDENT grows in knowledge and wisdom and matures in their Christian faith.

ONE STUDENT with your help, becomes a graduate of Northrise University.

ONE STUDENT is empowered to transform a nation.

ONE STUDENT will never forget that you gave.
EMIL MAKUKA

Emil is a graduate of Northrise University. Since graduation, Emil has created Mapalo Morning Glow Academy, a school to serve underprivileged children and orphans in an impoverished area, on the outskirts of Ndola. The school and orphanage now serves over 300 children, giving them an education and a hot meal every day. The vision of the academy is to care for the children, to teach them to be a blessing to their community, and to eventually attend Northrise University.

BELINDA GONDWE

Belinda is a graduate of Northrise University employed by one of the largest website service companies in Southern Africa. Belinda, a double orphan, was provided a scholarship by supporters in the U.S. to attend Northrise. By finding gainful employment after graduation, Belinda paid for her younger brother to attend Northrise and earn his degree. In addition, seven additional family members have also attended Northrise. Belinda is a powerful example of empowering the people of Zambia ONE STUDENT at a time.
The purpose of our multi-phase ‘Advancing the Vision’ campaign is to raise funds for the substantial expansion of facilities on our 640 acre main university campus in Ndola, Zambia. While our capital project includes new facilities and vital campus infrastructure – our focus is on advancing the vision of Northrise University to “empower the people of Zambia, one student at a time.”

Overview of Campus Expansion

- Annual enrollment is expected to grow from 750 to over 2,000 students in the next 5 years
- Construction of a campus center (completed June 2016), student activity center, convocation center and future schools of agriculture and engineering
- Construction of additional dormitories to increase student housing to 350+ students
- Four new faculty housing duplexes
- Infrastructure improvements to support additional student capacity and Northrise Farm production

Phase One

Phase One is nearly completed with the 26,000 square foot Campus Center being dedicated and occupied in June 2016. The building is home to faculty, students and staff and contains a 200 seat auditorium, library, computer lab, cafeteria and offices. Remaining infrastructure including roads, parking lots and the main campus entrance are under construction with planned completion in early 2017 as funding is provided.

Phase Two

Phase Two is scheduled to begin as soon as the remaining campus infrastructure is finished. Phase Two includes the construction of a new dormitory, two faculty duplexes, student activity center and lodge.

You’ll spend a week in Africa, but part of your heart will stay forever.

July 9-15, 2017

Let us know today if you’re thinking about coming! Don’t miss out! Connect now at www.northrise.org

“Declare His glory among the nations, His marvelous deeds among all the peoples.” 1 Chronicles 16:24
SERVING IN ZAMBIA WITH NORTHRISE UNIVERSITY

Many different opportunities are available to love, encourage, and serve the people of Zambia under the leadership of Northrise students and staff. Men’s and women’s conferences, children’s vacation bible school, medical and dental clinics, building and farm projects are just a few of the many ways to be part of an incredible week of mission and service.

SCHEDULE, JULY 9-15, 2017

- Arrive in Ndola on Sunday, July 9. Work starts Monday preparing for our service projects and getting familiar with the Northrise University campus and neighborhoods in Ndola.
- Tuesday through Friday we serve with the students of Northrise University and finish with a celebration event Friday evening open to all our Ndola neighbors.
- Leave Ndola on Saturday, July 15. For those opting in to the trip to Livingstone we fly to southern Zambia to experience Victoria Falls, one of the 7 Natural Wonders of the World and go on a safari!

COST DETAILS

Overall cost is approximately $4,500 depending on your flight arrangements and includes your participation in the trip to Victoria Falls in Livingstone. Fundraising tools are available.

- The set cost for the mission/service trip week in Ndola is $1,000/person which covers service project expenses as well as hotel and meals in Ndola, July 9-15.
- Flight expenses to travel to Zambia and back will vary, but average $2,000.
- The optional trip to Livingstone will cost approximately $1,500/person.

Commitment required before March 14, 2017, but space is limited so register early.

Let us know today if you’re thinking about coming, call Kelly, (602) 330-6274 or connect online: northrise.org/impact-ndola-2017
Northrise Farms has been under development since 2008 and participates in the local economy by producing food products for sale in the community, creating jobs, equipping local farmers and supporting the nutritional needs of Northrise University students. Northrise partners with Dordt College to educate local farmers and to develop future agricultural academic programs. Today, Northrise Farms consists of 32 acres of banana plants, 3 poultry houses and 86 head of cattle. Plans are being developed for the farm to move to full commercial operations in 2017 by implementing appropriate infrastructure, increasing cattle and crop capacity, optimizing production and achieving scalability. Northrise Farms is a key component of Northrise University’s long-term self sustainability strategy.
BANANAS
Bananas comprise 32 acres of Northrise Farms and is the primary crop produced and marketed to the local community. Northrise Farm’s bananas are known by the locals as the “sweetest bananas in Zambia”. The 32 acres of mature banana plants require significant hydration during the dry season and provide harvests twice a year. Under optimal conditions annual banana production can reach nearly 1,000 crates per acre, (25Kg or 55lbs per crate) providing nutritious food for the local community and students of Northrise.

Near term plans are focused on the development and implementation of a long-term sustainable water supply and retention infrastructure to optimize production of the current banana plants and to support the production of new crops in the future.

CHICKENS
Currently, Northrise Farms produces over 1,000 chickens per week to be sold in the marketplace and to provide meals for University students. Approximately 80% of the chickens are currently sold live in local communities to provide jobs and income opportunities for local residents. The chicken operation is comprised of 3 poultry houses with a total capacity of over 7,000.

Near-term plans include the addition of 3 poultry houses in order to expand capacity and achieve economies of scale. This would double current capacity reducing costs and increasing profits that can be reinvested into the University.

CATTLE
Today, the cattle herd consists of 86 head with new calves being born on a regular basis. The cattle herd is projected to be over 120 head by late 2017 at which time beef processing will begin. Beginning in 2018 it is projected that 70-75 head of cattle will be sold annually providing income to maintain and grow the herd and to provide funds for the University. Processed beef will also be provided for student meals.

Near-term plans include the addition of infrastructure to support cattle expansion and the possible addition of a processing facility.
